

THERMAL CLASSIC CURE

Therapeutic Programme for Rehabilitation, Prevention and Rejuvenation.

Since early times, people have enjoyed the benefits of thermal spas and used them as alternative treatments for a wide range of chronic diseases. Relaxing spas, massages, swimming in thermal water and wraps with natural thermal mud stimulate blood circulation, relax muscles, relieve pain caused by arthritis and help our body regain mobility. Moreover, the thermal springs of Edipsos in Greece have been known for their healing properties since around 500 BC, the time of Hippocrates, who recommended hydrotherapy as a treatment for rheumatism. The water emerges from a depth of 2500m at a temperature of 75-85 °C and is rich in minerals, as well as trace elements
