

WEIGHT LOSS & RECREATION

Weight loss programme

Excessive body weight is associated with various diseases. Thermae Sylla Spa Wellness Hotel offers guests the opportunity to restore their body to an ideal health condition by regaining and even increasing their energy via nutrition and other treatment types, which helps with the stabilization of metabolism and the reduction of blood sugar levels.

A weight loss programme for rehabilitation based on ancient dietary practices from Greece, the country with the highest life expectancy, including natural drinks with therapeutic properties, which help with the removal of excess fat.

Our main goal is to point out the importance of learning all about healthy eating by following a diet based on natural products, and encourage you to follow your diet plan until you reach an ideal weight by reducing the amount of fat and stabilizing muscle density (muscle density, bone density, skin etc.) with the simultaneous activation of metabolic functions. When the weight loss process is completed, we help you maintain your ideal weight for the rest of your life, thus improving your health and energy levels.

The weight loss programme is ideal for people who suffer from excess weight, fatigue, depression caused by their appearance, as well as eating disorders.

Key Symptoms:

- Obesity
- Excess weight
- Cellulite
- Poor blood circulation
- Water retention
- Low metabolic energy
